Key Strengths

- Approachable, helpful, adaptable, and polite
- Quick, efficient, and hardworking
- Strong team player
- Proactive and self-taught

AI-Augmented Workflow

I've integrated **agentic AI tools**, including **Claude Code**, **Codex** and **self-hosted models**, into my day-to-day development workflow. I use them to understand unfamiliar code, move faster on problems, and get productive in new technologies quickly, which gives me the flexibility to take on work outside my primary stack. I review and own everything that ships.
